Important hints for the making of screenprint and tampon print for boards.

In the price list the **FILM** sign with the letters T or S below indicates the film type required 1:1.

Raster films cannot be enlarged or reduced in size!

The letters mean the following T = tampon print S = screen print

T-films, layer down

For 1- to 4-colour print, print adjustment marks are necessary. They have to be at a distance of at least 30 mm from the motive. The neutral zone (30 mm between motive and adjustment marks) must be without any marks or notes! We need one film for every colour. More than one colour on one film cannot be handled! The film should be approx. 4 times bigger in length and width than the print motive.

S-films, layer up

Full colour process printing possible up to 28 points.

IMPORTANT!
